

Dear Families,

Thanks to the support of “Municipio 6” and the collaboration of “Associazioni Genitori Antismog”, all schools have started a project about a safer and more sustainable neighborhood mobility in particular about the movements of pupils near schools.

The survey you are up to do has the aim to detect your habits of the house-school journeys, to identify critical issues you meet along the way and collect all requests in order to make safer and more pleasant journeys. The team of our school, directed by our Headmaster, on the basis of the data collected by this research will make a Mobility school plan to guarantee the use of more sustainable means of transport.

Your child also need to take part in filling in this questionnaire, and this is very important because it can lead us to plan a less polluting and safer viability in our neighborhood.

Starting this year, the questionnaire will have an annual frequency, in order to have data that are always updated and comparable with previous years, useful for analyzing the evolution of the demand for internal school mobility.

We kindly ask you to fill in this form for each child you have.
